FISHERIES RESEARCH AND DEVELOPMENT CORPORATION (FRDC)

STATEMENT BY THE MANAGING DIRECTOR AND CHIEF FINANCIAL OFFICER

In our opinion, the attached financial statements for the period ended 31 August 2022 comply with subsection 42(2) of the Public Governance, Performance and Accountability Act 2013 (PGPA Act), and are based on properly maintained financial records as per subsection 41(2) of the PGPA

In our opinion, at the date of this statement, there are reasonable grounds to believe that the FRDC will be able to pay its debts as and when they fall

Signed Latrick Whose
Dr Patrick Hone
Managing Director

Overview of the FRDC

The FRDC is an Australian Government controlled entity. It is a not-for-profit entity established as a statutory corporation on 2 July 1991 under the provisions of the *Primary Industries Research and Development Act 1989* (PIRD Act). The FRDC's principal place of business is 25 Geils Court Deakin, ACT 1909

The FRDC's mission is to act as a national thought leader, facilitating knowledge creation, collaboration and innovation to shape the future of fishing and aquaculture in Australia for the benefit of the Australian people. To achieve this, the FRDC plans, invests in and manages research and development for fishing and aquaculture, and the wider community, and ensures that the resulting knowledge and innovation is adopted for impact. The FRDC also undertakes monitoring of key indicators of change across fishing and aquaculture. This helps in the evaluation of impact that results from the FRDC's investments. Information collected is also of use to decision makers, to understand and respond to emerging issues.

The FRDC's strong relationships with sectors, managers and researchers are fundamental to enable the needs of key stakeholders to be identified and addressed.

The FRDC is structured to meet the following outcome:

Increased economic, social and environmental benefits for Australian fishing and aquaculture, and the wider community, by investing in knowledge, innovation and marketing.

The continued existence of the FRDC in its present form, and with its present outcome, is dependent on Australian Government policy, and on continuing funding from the Australian Government for the FRDC's outcome.

The basis of preparation

The financial statements are required by:

- a) Section 42 of the Public Governance, Performance and Accountability Act 2013.
- The financial statements have been prepared in accordance with:
- a) Public Governance, Performance and Accountability (Financial Reporting) Rule 2015 (FRR); and
- b) Australian Accounting Standards and Interpretations including simplified disclosures for Tier 2 Entities under AASB 1060 issued by the Australian Accounting Standards Board (AASB) that apply for the reporting period.

The financial statements have been prepared on an accrual basis, and in accordance with the historical cost convention, except for certain assets and liabilities at fair value. Except where stated, no allowance is made for the effect of changing prices on the results or the financial position. The financial statements are presented in Australian dollars.

New Accounting Standards

The new standards, revised standards, interpretations and amending standards that were issued prior to the sign-off date and are applicable to the current reporting period, did not have a material effect on the FRDC's financial statements.

Standard/ Interpretation	Nature of change in accounting policy, transitional provisions, and adjustment to financial statements
AASB 1060 General Purpose Financial	AASB 1060 applies to annual reporting periods beginning on or after 1 July 2021 and replaces the
Statements – Simplified Disclosures for For-	reduced disclosure requirements (RDR) framework. The application of AASB 1060 involves some
Profit and Not-for-Profit Tier 2	reduction in disclosure compared to the RDR with no impact on the reported financial position, financial
Entities	performance and cash flows of the entity.

Taxation

The FRDC is exempt from all forms of taxation except Fringe Benefits Tax (FBT) and the Goods and Services Tax (GST).

Events after the reporting period

No reportable events have occurred after the Statement of Financial Position date.

Financial performance

Total suppliers	146,383	136,886

 $^{^{\}rm 1}$ The FRDC has no short-term lease commitments as at 31 August 2022.

The above lease disclosures should be read in conjunction with the accompanying Notes 2.2A and 2.4A.

Accounting policy

The FRDC has elected not to recognise right-of-use assets and lease liabilities for short-term leases of assets that have a lease term of 12 months or less and leases of low-value assets (less than \$10,000). The entity recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

	2022-23	2021-22
Note 1.1: Expenses continued	\$	\$
Note 1.1C: Research and development		
Projects		
Australian Government entities (related parties)	133,655	244,226

Stakeholder engagement and R&D activities ¹	156,181	69,284
Total Research and development	3,481,884	3,579,986

1 Stakeholder engagement and R&D activities include the dissemination of research outputs, extension activities, development and R&D support. Stakeholder engagement was reclassified from other expenses in the comparative year, and is now disclosed in research and development.

Accounting policy

The FRDC recognises project liabilities through project agreements that require research partners to perform services or provide facilities, or to meet eligibility criteria. In these cases, liabilities are recognised only to the extent that the services required have been performed to the FRDC's satisfaction, an invoice issued consistent with the contractual requirements and the invoice approved by the FRDC delegate.

Project commitments comprise the future funding of approved projects that are contingent on the achievement of agreed deliverables over the life of those projects (project agreements are exchanged prior to release of the first payment on a project). Projects, where amounts were payable but were unpaid at the end of the period, have been brought to account as project payables. The FRDC contracts to fund projects in future years in advance of receipt of the income needed to fund them. FRDC manages this risk by having the project agreement allow for termination at its sole discretion for any reason. If the FRDC were to terminate a project agreement, it would only be liable to compensate the research partner for any reasonable costs in respect of unavoidable loss incurred by the research provider and directly attributable to the termination of the agreement, provided that the costs are fully substantiated to the FRDC.

Project commitments are payable as follows:
Within 1 year
a a contract of the contract o

Within 1 year	39,946,073	32,478,354
More than 1 year	30,798,814	23,767,173

Own-source revenue		
Note 1.2A: Revenue from contracts with customers		
Australian Government entities (related parties) - over time	-	400,000
Total revenue from contracts with customers	<u> </u>	400,000

Revenue from contracts with customers is recognised when control has been transferred to the buyer. The FRDC determines a contract is in scope of AASB 15 when the performance obligations are required by an enforceable contract and the performance obligations within the enforceable contract are sufficiently specific to enable the FRDC to determine when they have been satisfied. The FRDC determines there to be an enforceable $contract \ when the \ agreement \ creates \ enforceable \ rights \ and \ obligations. \ Performance \ obligations \ are \ sufficiently \ specific \ where \ the \ promises$ within the contract are specific to the nature, type, value and quantity of the services to be provided and the period over which the services must

The FRDC receives revenue from the Australian Government under which it manages a suite of research activities. These activities are listed at Note 2.3B. FRDC has specific funding agreements with the Australian Government that include enforceable rights and performance obligations. The FRDC initially recognises the funding received as a liability to recognise the contract liability. Once the performance obligations have been satisfied as per the funding agreement deliverables over time, it is then recognised as revenue.

The transaction price is the total amount of consideration to which the FRDC expects to be entitled in exchange for transferring promised goods or services to a customer. The consideration promised in a contract with a customer may include fixed amounts, variable amounts, or both. All consideration promised in contracts with customers is included in the transaction price.

Receivables for services, which have 30 day terms, are recognised at the nominal amounts due less any impairment allowance account. $Collectability \ of \ debts \ is \ reviewed \ at \ the \ end \ of \ the \ reporting \ period. \ Allowances \ are \ made \ when \ collectability \ of \ the \ debt \ is \ no \ longer \ probable.$

AGVP is the average gross value of fisheries production for the current year and the two preceding financial years. The Australian Government's contribution of 0.50% of AGVP is made on the grounds that the FRDC exercises a stewardship role in relation to fisheries resources on behalf of the

Accounting policy

Revenue from the Australian Government

Revenues from the Australian Government are recognised when they are entitled to be received by the FRDC.

Funding received or receivable from non-corporate Commonwealth entities (appropriated to the non-corporate Commonwealth entity as a corporate Commonwealth entity payment item for payment to FRDC) is recognised as revenue from Government by the corporate Commonwealth entity unless the funding is in the nature of an equity injection or a loan.

² Matching of industry contributions (up to 0.25% of AGVP) by the Australian Government.

Accounting policy

Financial assets

Trade receivables, loans and other receivables that are held for the purpose of collecting the contractual cash flows where the cash flows are solely payments of principal and interest, that are not provided at below-market interest rates, are subsequently measured at amortised cost using the effective interest method adjusted for any loss allowance.

Carrying amount of right-of-use assets	662,355	-	-	662,355

Accounting policy

Assets are recorded at cost on acquisition except as stated below. The cost of acquisition includes the fair value of assets transferred in exchange and liabilities undertaken. Financial assets are initially measured at their fair value plus transaction costs where appropriate.

Assets acquired at no cost, or for nominal consideration, are initially recognised as assets and income at their fair value at the date of acquisition, unless acquired as a consequence of restructuring of administrative arrangements. In the latter case, assets are initially recognised as contributions by owners at the amounts at which they were recognised in the transferor's accounts immediately prior to the restructuring.

Asset recognition threshold

Purchases of property, plant and equipment are recognised initially at cost in the Statement of Financial Position, except for purchases costing less than \$5,000 that are expensed in the year of acquisition (other than where they form part of a group of similar items where the value is greater than \$5.000).

Lease right-of-use (ROU) assets

Lease ROU assets are capitalised at the commencement date of the lease and comprise of the initial lease liability amount, initial direct costs incurred when entering into the lease less any lease incentives received. These assets are accounted for by Commonwealth lessees as separate asset classes to corresponding assets owned outright, but included in the same column as where the corresponding underlying assets would be presented if they were owned.

Following initial application, an impairment review is undertaken for any ROU lease asset that shows indicators of impairment and an impairment loss is recognised against any ROU lease asset that is impaired. Lease ROU assets continue to be measured at cost after initial recognition in Commonwealth agency, general government sector (GGS) and whole of government financial statements.

Revaluations

Following initial recognition at cost, property, plant and equipment (excluding ROU assets) are carried at fair value less subsequent accumulated depreciation and accumulated impairment losses. Valuations are conducted with sufficient frequency to ensure that the carrying amounts of assets do not differ materially from the assets' fair values as at the reporting date. The regularity of independent valuations depend on the volatility of movements in market values for the relevant assets.

Revaluation adjustments are made on a class basis. Any revaluation increment is credited to equity under the heading of asset revaluation reserve except to the extent that it reverses a previous revaluation decrement of the same asset class that was previously recognised in the surplus/deficit. Revaluation decrements for a class of assets are recognised directly in the surplus/deficit except to the extent that they reversed a previous revaluation increment for that class.

Any accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset, and the asset restated to the revalued amount.

Depreciatio

Depreciable property, plant and equipment assets are written off to their estimated residual values over their estimated useful lives to the FRDC using, in all cases, the straight-line method of depreciation.

Depreciation rates (useful lives), residual values and methods are reviewed at each reporting date and necessary adjustments are recognised in the current, or current and future reporting periods, as appropriate.

Depreciation rates applying to each class of depreciable asset are based on the following useful lives:

	2022-23	2021-22
Buildings (including ROU assets)	Lease term	Lease term
Leasehold improvements	Lease term	Lease term
Plant and equipment	up to 5 years	up to 5 years

<u>Impairment</u>

All assets were assessed for impairment at 31 August 2022. Where indications of impairment exist, the asset's recoverable amount is estimated and an impairment adjustment made if the asset's recoverable amount is less than its carrying amount.

The recoverable amount of an asset is the higher of its fair value less costs of disposal and its value in use. Value in use is the present value of the future cash flows expected to be derived from the asset. Where the future economic benefit of an asset is not primarily dependent on the asset's ability to generate future cash flows, and the asset would be replaced if the FRDC were deprived of the asset, its value in use is taken to be its depreciated replacement cost.

Derecognition

An item of property, plant and equipment is derecognised upon disposal, or when no further future economic benefits are expected from its use or disposal.

Intangibles

The FRDC's intangibles comprise internally developed software and purchased software for internal use. These assets are carried at cost less accumulated amortisation and accumulated impairment losses.

Software is amortised on a straight-line basis over its anticipated useful life. The useful lives of the FRDC's software is 10 years (2021-22: 10 years). All software assets were assessed for indications of impairment as at 31 August 2022.

The FRDC in its capacity as lessee has leased office accommodation located at:

- Fisheries Research House, 25 Geils Court, Deakin, Australian Capital Territory, which expires 31 July 2023, and has a 3 year right of renewal until 31 July 2026. Lease payments are paid on a monthly basis and subject to a 3 per cent annual increase in accordance with the lease agreement.
- Wine Australia, corner of Botanic and Hackney Roads, Adelaide, South Australia was renewed 1 August 2021 and expires on 31 July 2026, with an option to renew on 1 August 2026. Lease payments are subject to a CPI annual increase in accordance with the lease arregement

The above lease disclosures should be read in conjunction with the accompanying Notes 1.1B and 2.4A.

Accounting policy

For all new contracts entered into, the FRDC considers whether the contract is, or contains a lease. A lease is defined as 'a contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration'.

Once it has been determined that a contract is, or contains a lease, the lease liability is initially measured at the present value of the lease payments unpaid at the commencement date, discounted using the interest rate implicit in the lease, if that rate is readily determinable, or the FRDC's incremental borrowing rate.

Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest. It is remeasured to reflect any reassessment or modification to the lease. When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset or profit and loss depending on the nature of the reassessment or modification.

People and relationships

r copie and relationships		
	2022-23	2021-22
Note 3.1: Employee provisions	\$	\$
Note 3.1A: Employee provisions		
Leave	1,211,332	813,806
Total employee provisions	1,211,332	813,806

Accounting policy

Liabilities for short-term employee benefits and termination benefits expected within 12 months of the end of reporting period are measured at their nominal amounts

Leave

The liability for employee benefits includes provision for annual leave and long service leave. The leave liabilities are calculated on the basis of employees' remuneration at the estimated salary rates that will be applied at the time the leave is taken, including the FRDC's employer superannuation contribution rates to the extent that the leave is likely to be taken during service rather than paid out on termination. The liability for long service leave has been determined by reference to the requirements of the short-hand method. The estimate of the present value of the liability takes into account attrition rates and pay increases through promotion and inflation.

Superannuation

The FRDC's staff are members of the Public Sector Superannuation Scheme (PSS), or the PSS accumulation plan (PSSap), or other superannuation funds held outside the Australian Government.

The PSS is a defined benefit scheme for the Australian Government. The PSSap and any other superannuation funds are defined contribution schemes

The liability for defined benefits is recognised in the financial statements of the Australian Government and is settled by the Australian Government in due course. This liability is reported in the Department of Finance's administered schedules and notes.

The FRDC makes employer contributions to the employee's defined benefit superannuation scheme at rates determined by an actuary to be sufficient to meet the current cost to the Australian Government. The FRDC accounts for the contributions as if they were contributions to defined contribution plans.

Note 3.2: Key management personnel remuneration

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the FRDC, directly or indirectly, including any director of the board (whether executive or otherwise) of the FRDC. The FRDC has determined the key management personnel to be the non-executive directors, the Managing Director and senior general managers. Key management personnel remuneration is reported in the table below:

	2022-23 \$	2021-22 \$
Short-term employee benefits	259.576	221,062
Post-employment benefits	42,110	34,987
Other long-term employee benefits	27,176	21,991
Total key management personnel remuneration expenses ¹	328,862	278,040

- ¹ The total number of key management personnel that are included in the above table is 14 (2021-22: 13). They are made up of:
 - one non-executive director (Chair)
 - seven non-executive directors
 - one Managing Director
 - five senior general managers

	Dr Lyndal Thorburn	Director (Appointed 1 September 2021) (Member Remuneration Committee)

Note 3.4A: Transactions with director-related entities

The FRDC's practice is to disclose all transactions with an entity with whom a director has an association. This means that where directors have disclosed a material personal interest, all the transactions with that entity will be disclosed. Typically, the FRDC will not transact with all the entities for which a director has made such a declaration. The transactions that are not with related parties as defined by AASB 124 *Related Party Disclosures*, are identified below with an asterisk (*).

The FRDC's 'Board governance policy' provides guidance to directors on how the FRDC deals with material personal interests. Where a director has an association with an entity where a conflict has the potential to arise, in addition to the duty to disclose that association, the director absents him/herself from both the discussion and the decision-making process.

Given the breadth of Australian Government activities, related parties may transact with the government sector in the same capacity as ordinary citizens. These transactions have not been separately disclosed in this note.

The directors disclosed material personal interests during the directors' related period.

Accounting policy

Financial assets

As per AASB 9 Financial Instruments, the FRDC classifies its financial assets in the following category:

- financial assets measured at amortised cost.

 $The \ classification \ depends \ on \ both \ the \ FRDC's \ business \ model for \ managing \ the \ financial \ assets \ and \ contractual \ cash \ flow \ characteristics \ at \ the \ financial \ assets \ and \ contractual \ cash \ flow \ characteristics \ at \ the \ financial \ assets \ and \ contractual \ cash \ flow \ characteristics \ at \ the \ financial \ assets \ and \ contractual \ cash \ flow \ characteristics \ at \ the \ financial \ assets \ and \ contractual \ cash \ flow \ characteristics \ at \ the \ financial \ assets \ and \ contractual \ cash \ flow \ characteristics \ at \ the \ financial \ assets \ and \ contractual \ cash \ flow \ characteristics \ at \ cash \ cash$ time of initial recognition. Financial assets are recognised when the FRDC becomes a party to the contract and, as a consequence, has a legal right to receive or a legal obligation to pay cash and derecognised when the contractual rights to the cash flows from the financial asset expire or are transferred upon trade date.

Financial assets at amortised cost

Financial assets included in this category need to meet two criteria:

- 1. the financial asset is held in order to collect the contractual cash flows; and
- 2. the cash flows are solely payments of principal and interest (SPPI) on the principal outstanding amount.

Effective interest method

Income is recognised on an effective interest rate basis for financial assets that are recognised at amortised cost.

Impairment of financial assets

Financial assets are assessed for impairment at the end of each reporting period based on expected credit losses, using the general approach which measures the loss allowance based on an amount equal to lifetime expected credit losses where risk has significantly increased, or an amount equal to 12-month expected credit losses if risk has not increased.

The simplified approach for trade, contract and lease receivables is used. This approach always measures the loss allowance as the amount equal to the lifetime expected credit losses.

A write-off constitutes a derecognition event where the write-off directly reduces the gross carrying amount of the financial asset.

Financial liabilities

Financial liabilities are classified as either financial liabilities 'at fair value through profit or loss' or other financial liabilities.

Financial liabilities are recognised and derecognised upon 'trade date'.

Financial liabilities at amortised cost

Financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs. These liabilities are subsequently measured $at amortised \ cost \ using \ the \ effective \ interest \ method, \ with \ interest \ expense \ recognised \ on \ an \ effective \ interest \ basis.$

Supplier and other payables are recognised at amortised cost. Liabilities are recognised to the extent that the goods or services have been received (and irrespective of having been invoiced).

	2022-23	2021-22
Note 4.1B: Net gains or losses on financial assets	\$_	\$
Financial assets at amortised cost		
Interest revenue	87,999	6,609
Net gains on financial assets at amortised cost	87,999	6,609
There are no gains or losses on financial liabilities.		

Note 4.2: Fair value measurement

Accounting policy

FRDC engaged Jones Lang LaSalle Public Sector Valuations (JLL) to conduct an asset revaluation of all plant and equipment assets as at 30 June 2022. An annual assessment is undertaken to determine whether the carrying amount of the assets is materially different from the fair value. Comprehensive valuations are carried out at least once every three years. JLL has provided written assurance to the FRDC that the models developed are in compliance with AASB 13.

The methods utilised to determine and substantiate the unobservable inputs are derived and evaluated as follows.

Physical depreciation and obsolescence under the depreciated replacement cost approach, the estimated cost to replace the asset is calculated and then adjusted to take into account physical depreciation and obsolescence. Physical depreciation and obsolescence has been determined based on professional judgement regarding physical, economic and external obsolescence factors relevant to the asset under consideration. For all leasehold improvement assets, the consumed economic benefit / asset obsolescence deduction is determined based on the term of the associated lease.

FRDC's policy is to recognise transfers into, and transfers out of, fair value hierarchy levels as at the end of the reporting period.
