**National Seafood Industry Leadership Program 2008**
**Project Summary/Overview**

**Project Title:**     *Computerised Quality Index Manual*

## Project Goal:

To provide specifications for a computerised version of the Quality Index Manual developed by SFM & FRDC.

## Project Implementation Strategies (what you did) or Project Process:

Prepared a synopsis of what the program should do and how it should look & feel to the users.  Designed the overall Graphical User Interface for the system.

## Outcomes (what you have done):

Provided a high level specification of the proposed software system.

## Next Steps (what you will do to finish the project or progress it further):

Produce a working prototype model of the proposed system.  When time and funding permits.

## Leadership learnt

Leading a team is easier than leading myself. As a leader I find it is better if I have someone to lead.  Keeping a team oriented on a goal and working together to achieve that goal is what a leader does best.  As a leader you do not have to be the most skilled, you just need to be best suited to finding and utilising the skills in others.
